---

Thanks Bill. The only work proposed on Saturday would be identifying the utilities with Ground Penetrating Radar and marking those areas out. We are discussing with the subcontractor now whether we have to do it Saturday or it can be completed our first day at the site, Tuesday morning. I will let you all know when I do. Thanks

Ben, there are no utility maps available and there is sewer located under the warehouse floor only.

See answers from len Below,

Also, Are they planning to conduct any work on Saturday? Do you need the room emptied?

- 1) Is there a underground utility site map ? **Len, as property owner, do you have an underground utility diagram/map?***[william Burg]* None available
- 2) Inside the building, is there electric (**Yes**), storm (**unknown**), sewer under the floor (**unknown**)*[william Burg]* Warehouse only. Please let us know about storm water system and sewer underneath the Greater Niagara Building

Thanks Bill

Ben, please contact the subcontractor to set the time range for Saturday, February 27<sup>th</sup>.

Len, we just need the answers to Questions 1 & 2 below. Thanks

**Subject:** NFB - Utility Clearance

Good Afternoon Len and Bill:

In preparation for our assessment next Tuesday inside the Greater Niagara Building, below are questions raised by our subcontractor. Please review our responses and add to our answers please.

- 1) Is there a underground utility site map ? **Len, as property owner, do you have an underground utility diagram/map?***[william Burg]* None available
- 2) Inside the building, is there electric (**Yes**), storm (**unknown**), sewer under the floor (**unknown**)*[william Burg]* Warehouse only. Please let us know about storm water system and sewer underneath the Greater Niagara Building
- 3) Is the floor concrete (**Yes**)? It will make a difference if we have to use GPR.
- 4) Are the areas marked and how large of an area are we locating? **The locations are marked on the attached figure, but they will be physically marked out during the sampling event. The utilities will be located within the immediate vicinity of the proposed soil boring location.**
- 5) Could the (utility locating) job be done on Saturday, February 27 or Sunday, February 28? Access **Access will only be possible on those days with property owner approval and property owner presence during utility location work. Len and Bill please let me know if you approve the utility location work being performed on or Sunday with facility personnel present?**

Thanks
